

Repos

Environmental Product Passport

The information in this product passport is only valid for the following variant:

Repos – Art. no. 210 747 00

For additional information about Repos, visit our website

More details about Vitra's environmental mission are available at
vitra.com/about-vitra.

Carbon footprint

The carbon footprint stands for the amount of greenhouse gas emissions (also referred to as carbon emissions) generated throughout a product's entire life cycle. The carbon footprint is most commonly expressed in CO₂ equivalents (CO₂e) as a standard measure for the warming effect of all greenhouse gases.

● Raw materials, incl. extraction and processing	233.0	87.92%
● Transport and installation	20.0	7.55%
● End-of-life and disposal	12.0	4.53%
Total / kg CO₂e	265.0	100%

This calculation includes emissions from direct suppliers (Tier 1).
Total may vary slightly from 100% due to rounding.

Recycling

Following the principle of the circular economy, Vitra uses the largest amount of recycled and recyclable materials possible. This proportion will increase as a result of ongoing product development.

Post-consumer recycled content	Post-industrial recycled content	Total recycled content	Recyclability
25%	26%	51%	77%

Further information including a glossary of terms is available at www.vitra.com/sustainability.

Material Composition

Vitra uses a wide range of materials that must all withstand stringent internal and external testing procedures. If a new material is found that is better for the environment and meets Vitra's quality criteria, suitable products are executed in that material.

Steel	29.0%
Polyamide (Post Industrial Recycled, glassfiber reinforced)	19.9%
Polyurethane	16.6%
Aluminium	12.8%
Acrylonitrile-Butadiene-Styrene (Post Industrial Recycled, glassfiber reinforced)	10.2%
Wool	4.6%
Polypropylene	1.9%
Rubber	1.6%
Polyamide	1.2%
Polyester	0.8%
Polyoxymethylene	0.4%
Feathers	0.3%
Polyamide (glassfiber reinforced)	0.2%
Acrylonitrile-Butadiene-Styrene	0.2%
Polyethylene	0.2%
Brass	0.1%
Total	100%

Total may vary slightly from 100% due to rounding.

Packaging and logistics

Vitra uses detailed information to elaborate targeted optimisation of transport routes. Preference is given to rail transport, and Vitra aims for the most efficient capacity management possible when using lorries.

Packaging serves to protect the product and minimise the transport volume. Packaging is reduced wherever possible and materials are optimised in terms of their impact on the environment.

Packaging and materials	Purpose	Weight
Cardboard box, FSC-certified made of min. 50% recycled paper	Product protection and stackability	6081g
1 plastic bag made of min. 50% recycled polyethylene	Protection from dust, humidity and scratches	348g

Supply chain

Vitra purchases its raw materials and components almost exclusively from suppliers in Europe, which simplifies compliance with uniform statutory standards and shortens transport routes. Vitra maintains long-term relationships with many of its suppliers, some spanning several decades, which is a key advantage for the further development of products, technologies and materials.

79%

European suppliers

100%

assembled in Europe

This map and percentage calculation represents Vitra's direct suppliers (Tier 1). Total may vary slightly from 100% due to rounding. Percentages by weight.

Provenance of Components			
1 Italy		45.1%

Certificates

To offer transparency with regard to a product's most important environmental factors, Vitra provides certificates from external testing institutes. For this purpose, Vitra focuses on a selection of certificates that explicitly cover key elements of the respective product.

Greenguard Gold

The GREENGUARD GOLD label for indoor air quality recognises products that contribute to the creation of healthier indoor environments.

[Link to certificate](#)

GS

With the GS seal for tested safety, a state-authorised inspection institute certifies the suitability and safety of the construction and monitors production at regular intervals.

[Link to certificate](#)

BIFMA

Repos fulfils the ANSI/BIFMA standard X5.1-2011, thus meeting the stringent safety requirements for the US market.

*For end customers by registering via <https://www.vitra.com/warranty>.
For corporate customers on request as part of the Customer Contract Policy.

Further Information and Contact Details

The information in this product passport is only valid for the following variant:

Repos – Art. no. 210 747 00

Base Aluminum polished,
fabric Volo,
high seat height,
glides for carpet

Source for Carbon Footprint:
Environmental Product Declaration. The EPD conforms to ISO 14025, 14040, 14044 and is externally verified.
Life Cycle Impact Assessment Results for one chair (functional unit), that is used for 10 years.
The system boundary is cradle-to-grave.
