LexCo Collection Overview

Product Details

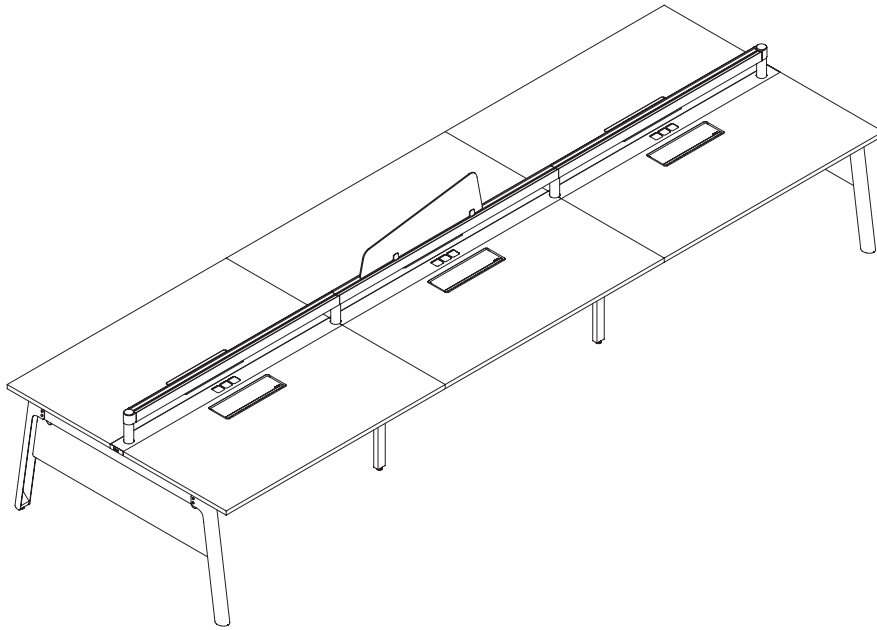

LexCo Collection is a benching system based on Support beam understructure.

LexCo Collection can be configured on two different height logics to create various workstations, at regular desk height (720mm) or at highsit height (1000mm) level.

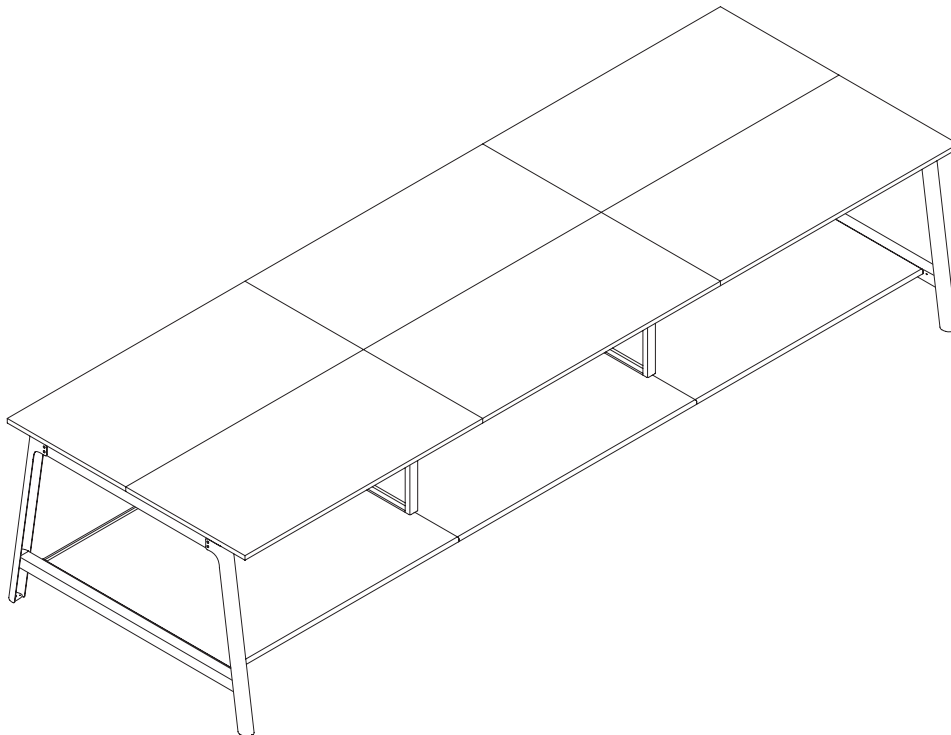

Configuration

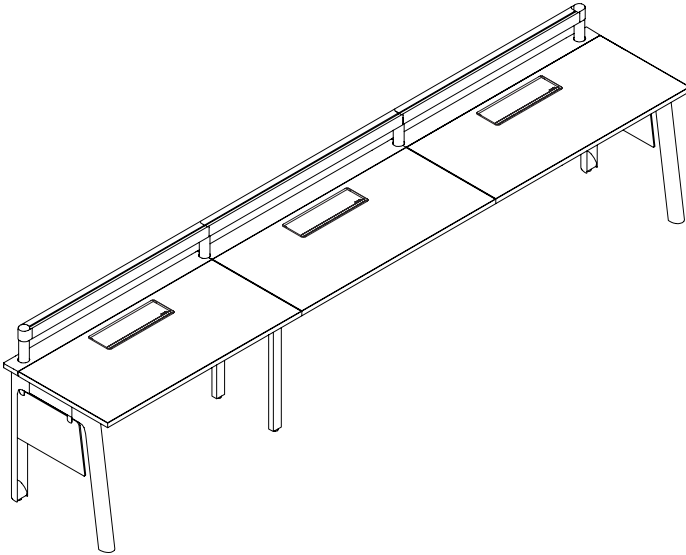

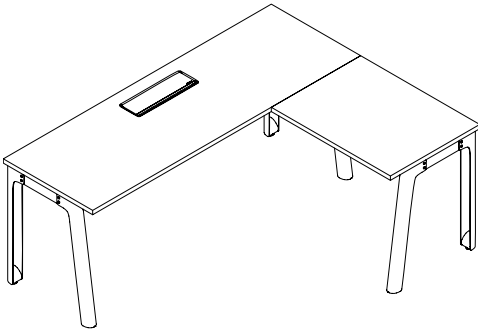

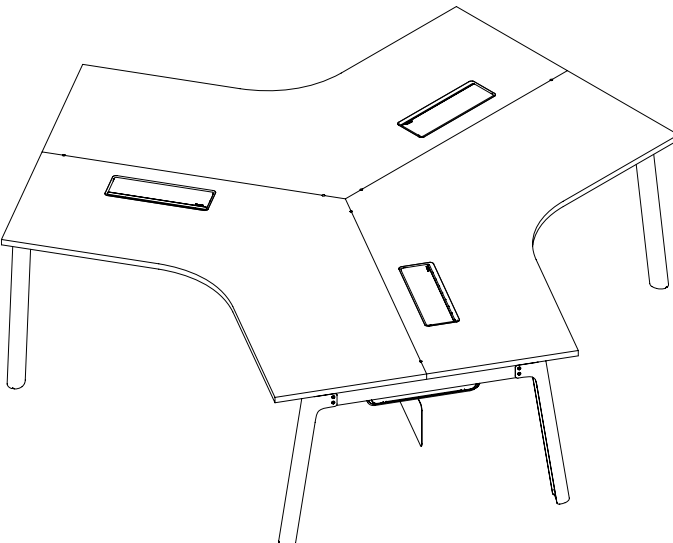

Dual-Sided Bench

Desk Height

HighSit

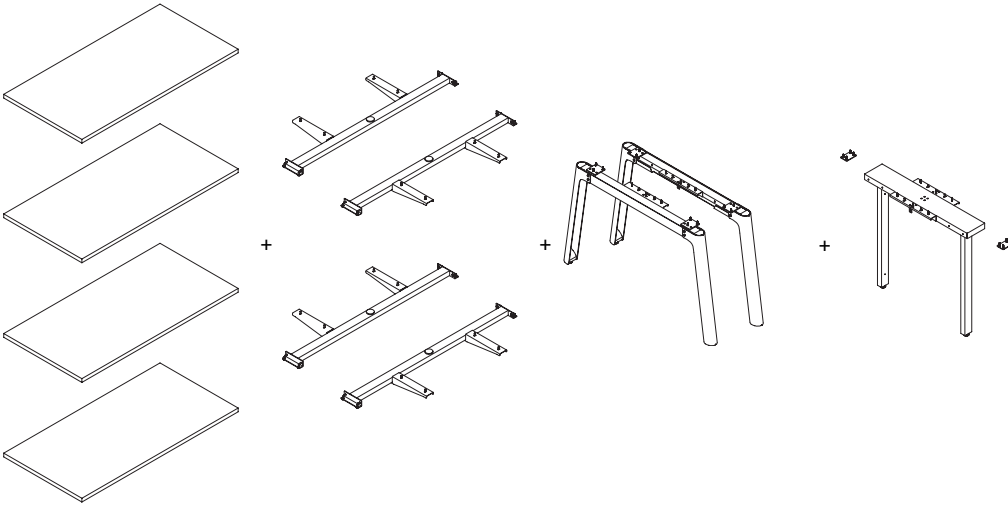

Configuration**Desk Height****Single-Sided Bench****Return Desk****120 Degree Bench**

Specification Logic

Bench with Stance Leg or A-Leg

Dual-Sided Bench – Cluster of 4

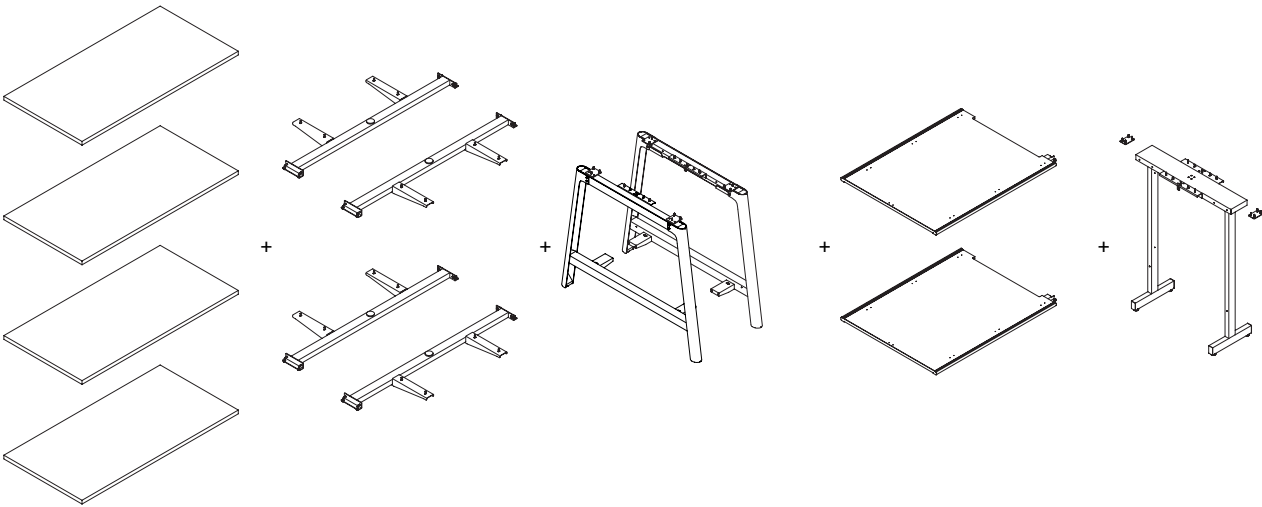

4 Worksurfaces

4 Support Beams

2 End Legs

1 Intermediate Leg

HighSit Dual-Sided Bench – Cluster of 4

4 Worksurfaces

4 Support Beams

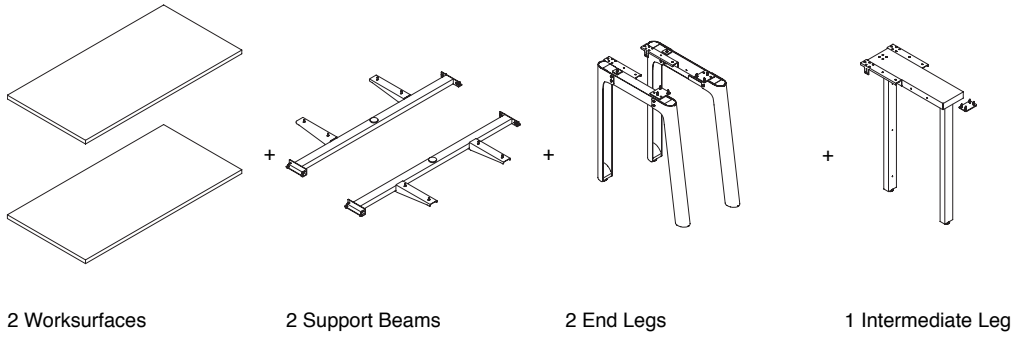

2 End Legs

2 HighSit Footrest Platform

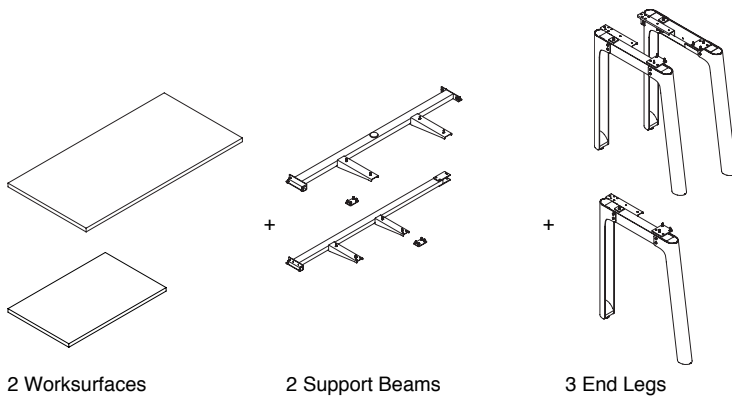

1 Intermediate Leg

Bench with Stance Leg or A-Leg

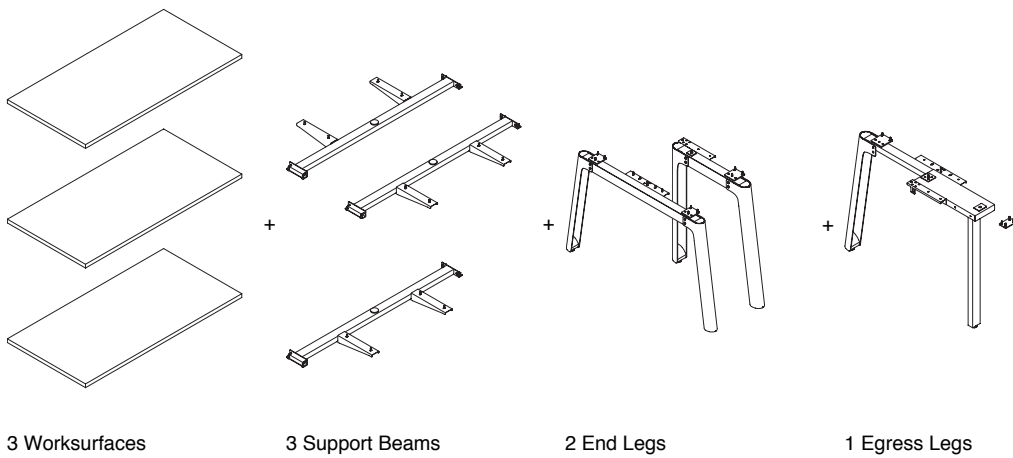

Single-Sided Bench – Cluster of 2

Return Desk

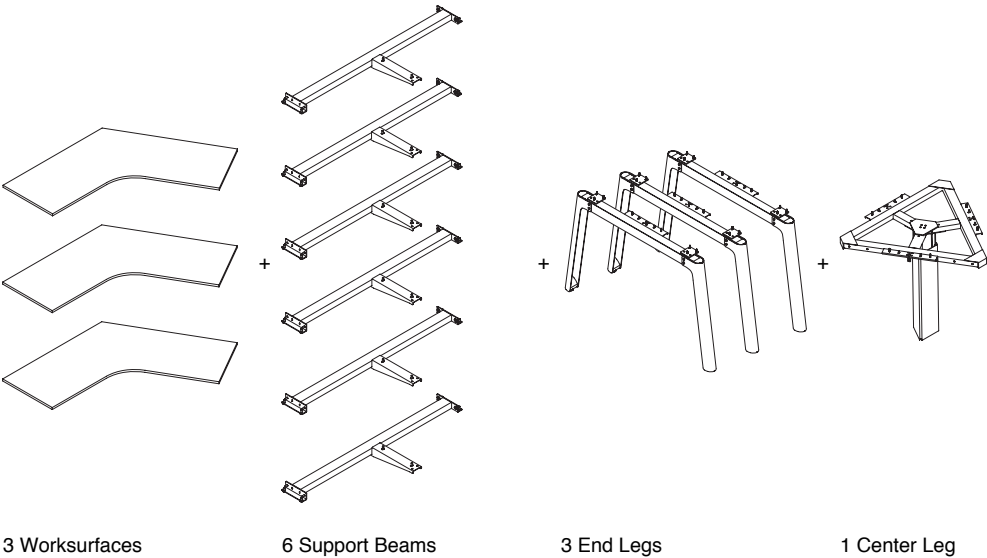

Bench – with Egress (Require to comply minimum of 3 pax of benches)

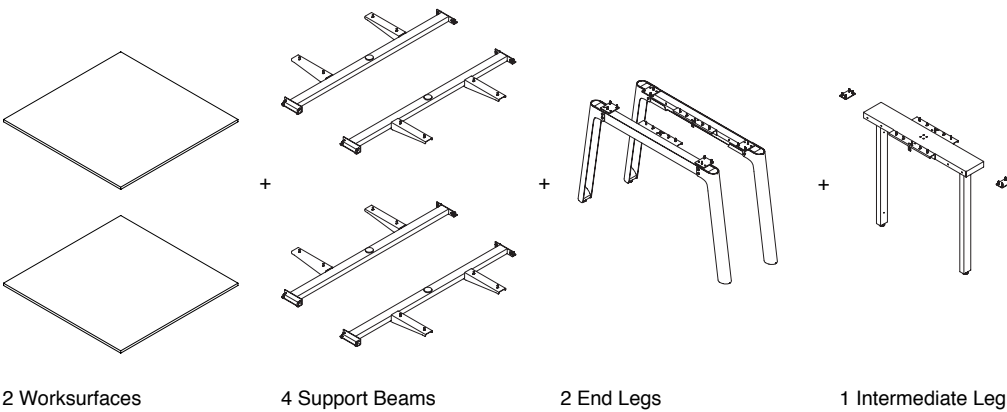

Bench with Stance Leg or A-Leg

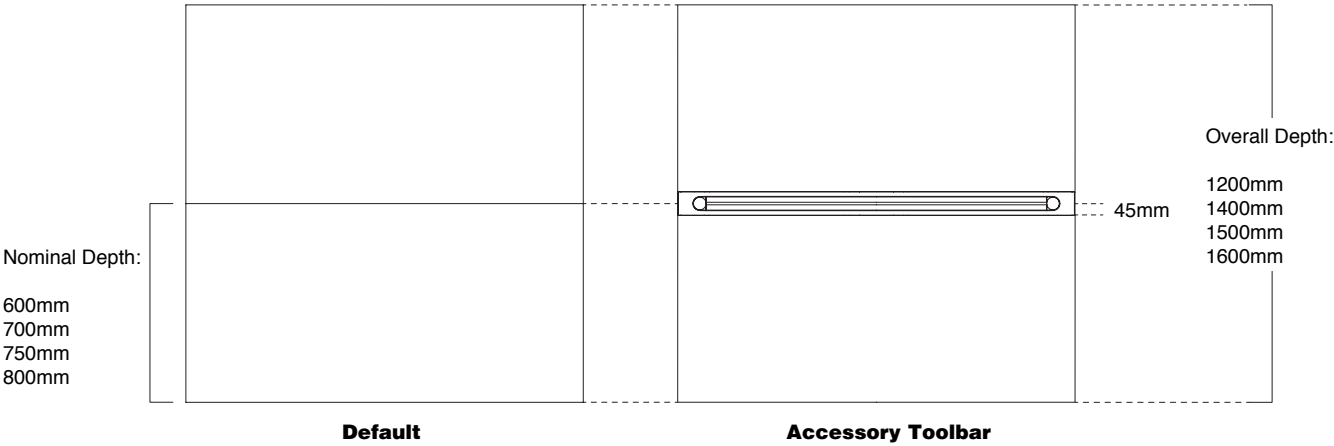

120 Degree Bench – Cluster of 3

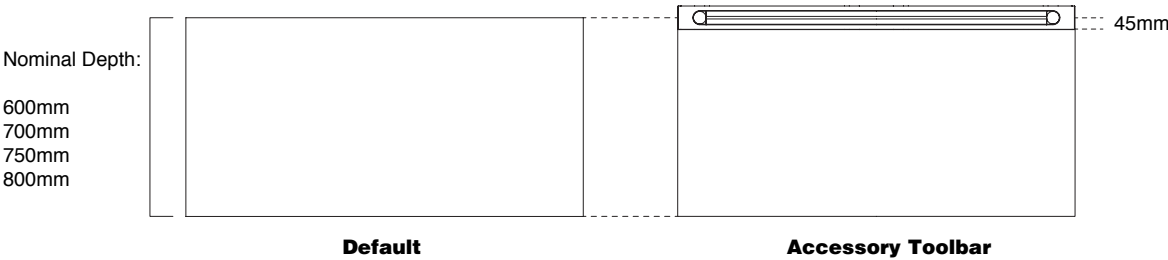

Meeting Table

Dual-Sided

Single-Sided

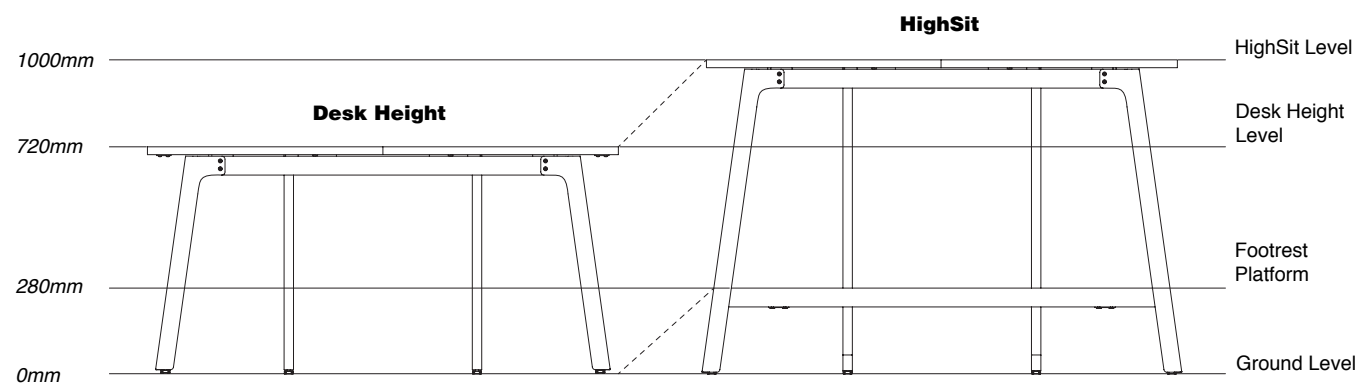

As a default, bench worksurfaces actual depths are same as nominal depths.

When **Recess for Toolbar** is specified, bench worksurfaces are **45mm** shorter than nominal planning depths of 600mm, 700mm, 750mm and 800mm. This shorter depth is to allow for integration of Accessory Toolbar.

Trench can be specified to close the gap and have full depth worksurface.

The overall dual sided bench depths always remain as 1200mm, 1400mm, 1500mm and 1600mm.

Height Logic

LexCo Collection Dual-Sided Bench can be specified at both desk height and at HighSit.

Desk Height worksurfaces are at a height of 720mm from the floor.

HighSit worksurfaces are at a height of 1000mm from the floor.

The footrest is a full depth platform to allow for greater range of postures. The platform comes as default with carpet, which can be specified without carpet.

*For using non-standard carpet, specify the 'No Carpet'. Foot platforms will be delivered without any carpet. Any regular carpet tiles of **5 – 7mm** thickness would fit into the edge trim and can be installed later.

Dual-sided bench is connected by support beam to create benching applications. Surfaces are E0 25mm-thick LPL and supported by legs.

Overall depths range from 1200D to 1600D. Widths range from 1200W to 1800W.

Worksurface with **recess for toolbar**.

Accessory Toolbar is located in center of dual-sided bench allows for the mounting of Sarto screens, PET visual dividers and other worktools.

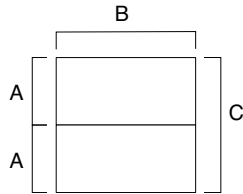

Trench with power cutout and end cap as option.

Stance leg and A-leg come with modesty as an option. Legs are fixed-height with top of surface at 720mm from floor.

Intermediate leg is available for dual-sided bench. Leg is fixed height with the top of surface at 720mm from floor.

Leg glides have 25mm of adjustment for uneven floors.

Soft edge, available as option, reduces unhealthy pressure on forearms, as well as feelings of shoulder and neck fatigue. Edge is soft to the touch and flexes to conform to the arm.

Actual Dimensions (mm)	
A	600, 700, 750, 800
B	1200, 1400, 1500, 1600 or 1800
C	1200, 1400, 1500 or 1600
Height	720

Note: Actual worksurface depths depends on whether its a full depth or reduced depth.

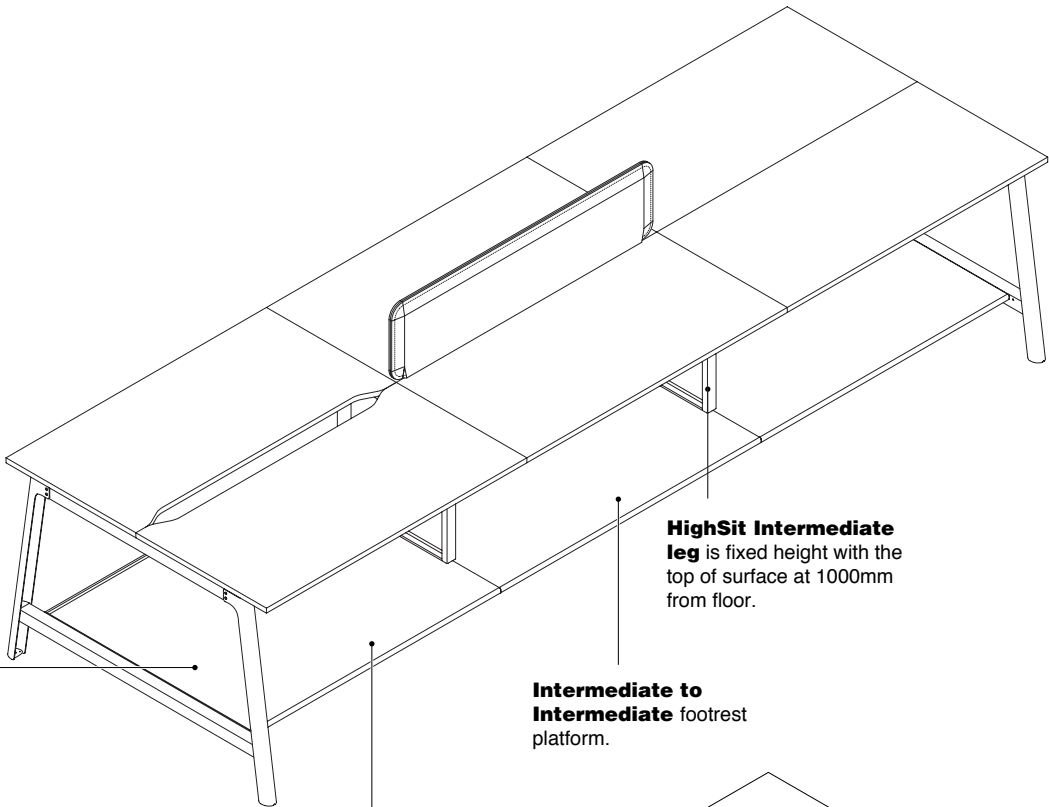

HighSit Bench with Footrest Platform/Strip

HighSit bench is connected by support beam and footrest platform to create benching applications. Surfaces are E0 25mm-thick LPL and supported by legs.

Overall depths range from 1200D to 1600D. Widths range from 1200W to 1800W.

HighSit bench offers similar options as Dual-sided bench, including Modesty Panels and Accessory Toolbar etc.

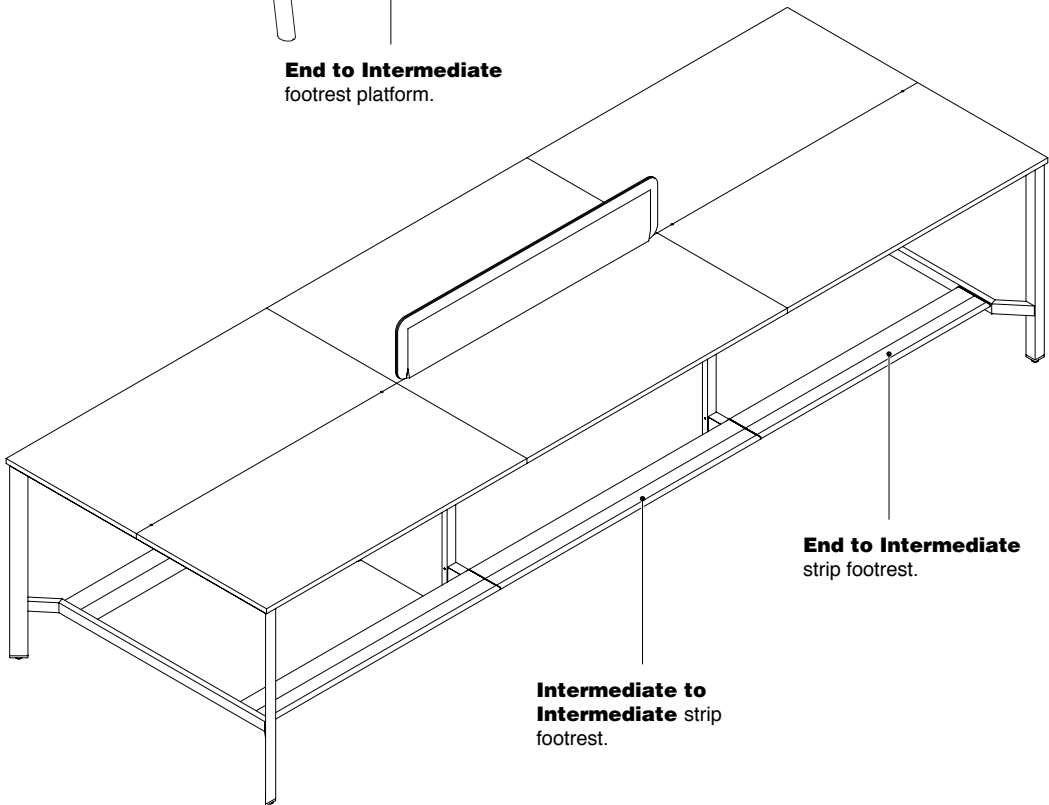

Footrest platform must be specified when ordering any HighSit Height configuration. It acts as raised floor and supports the HighSit Legs. This allows for workers to be fully comfortable in various postures.

HighSit Intermediate leg is fixed height with the top of surface at 1000mm from floor.

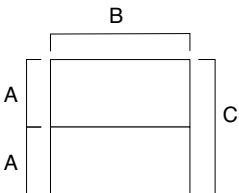

Intermediate to Intermediate footrest platform.

End to Intermediate footrest platform.

End to Intermediate strip footrest.

Intermediate to Intermediate strip footrest.

Actual Dimensions (mm)

A	600, 700, 750, 800
B	1200, 1400, 1500, 1600 or 1800
C	1200, 1400, 1500 or 1600
Height	1000

Note: Actual worksurface depths depends on whether its a full depth or reduced depth.

Single-sided bench is connected by support beam to create benching applications. Surfaces are E0 25mm-thick LPL and supported by legs.

Overall depths range from 600D to 800D. Widths range from 1200W to 1800W.

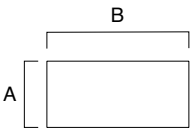

Accessory Toolbar is located in front of single-sided bench allows for the mounting PET visual dividers and other worktools.

Trench with power cutout and end cap as option.

Stance leg and A-leg come with **modesty as an option**. Legs are fixed-height with top of surface at 720mm from floor.

Intermediate leg is available for dual-sided bench. Leg is fixed height with the top of surface at 720mm from floor.

Leg glides have 25mm of adjustment for uneven floors.

Actual Dimensions (mm)	
A	600, 700, 750, 800
B	1200, 1400, 1500, 1600 or 1800
Height	720

Note: Actual worksurface depths depends on whether its a full depth or reduced depth.

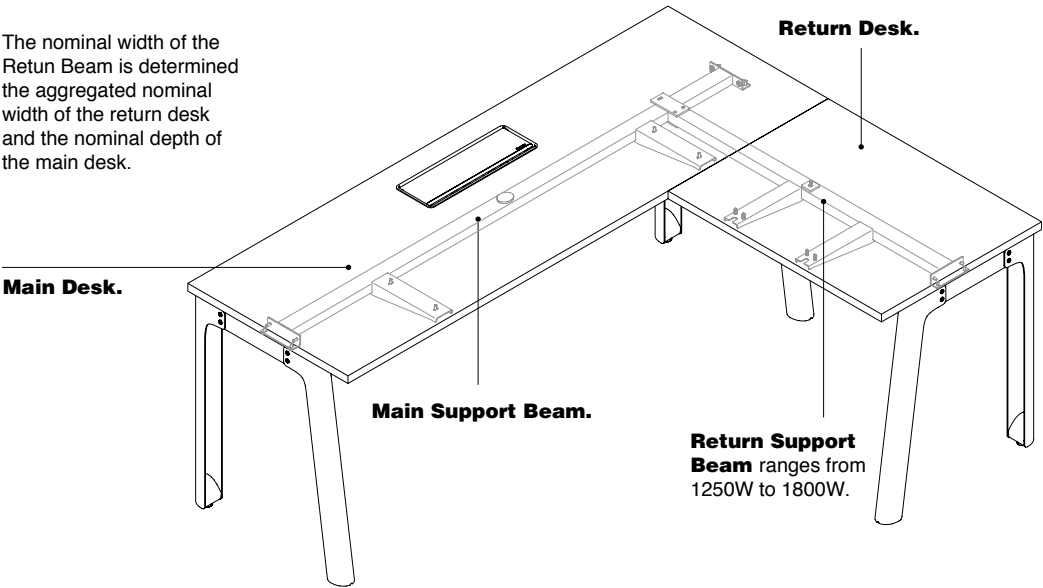

Return Desk with Support Beam

Return desk is available to connect with single-sided desk or bench to form a 90-Degree workstation.

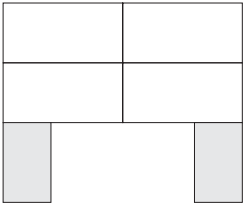

Return beam is used to setup return desk to a single desk or bench.

Return desk worksurface range from 500D to 600D.
Widths range from 650W to 1000W.

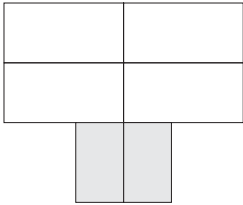

The nominal width of the Return Beam is determined the aggregated nominal width of the return desk and the nominal depth of the main desk.

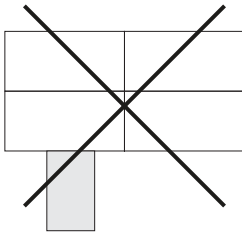

Configuration with Dual-sided bench:

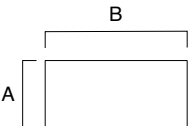

Each return desk is supported by single-sided leg.

Return desks can be supported by dual-sided leg.

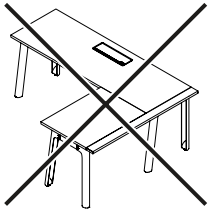

Not recommended.

Actual Dimensions (mm)	
A	500, 600
B	650, 700, 750, 800, 850, 900 or 1000
Height	720

Application Topics

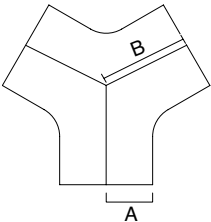

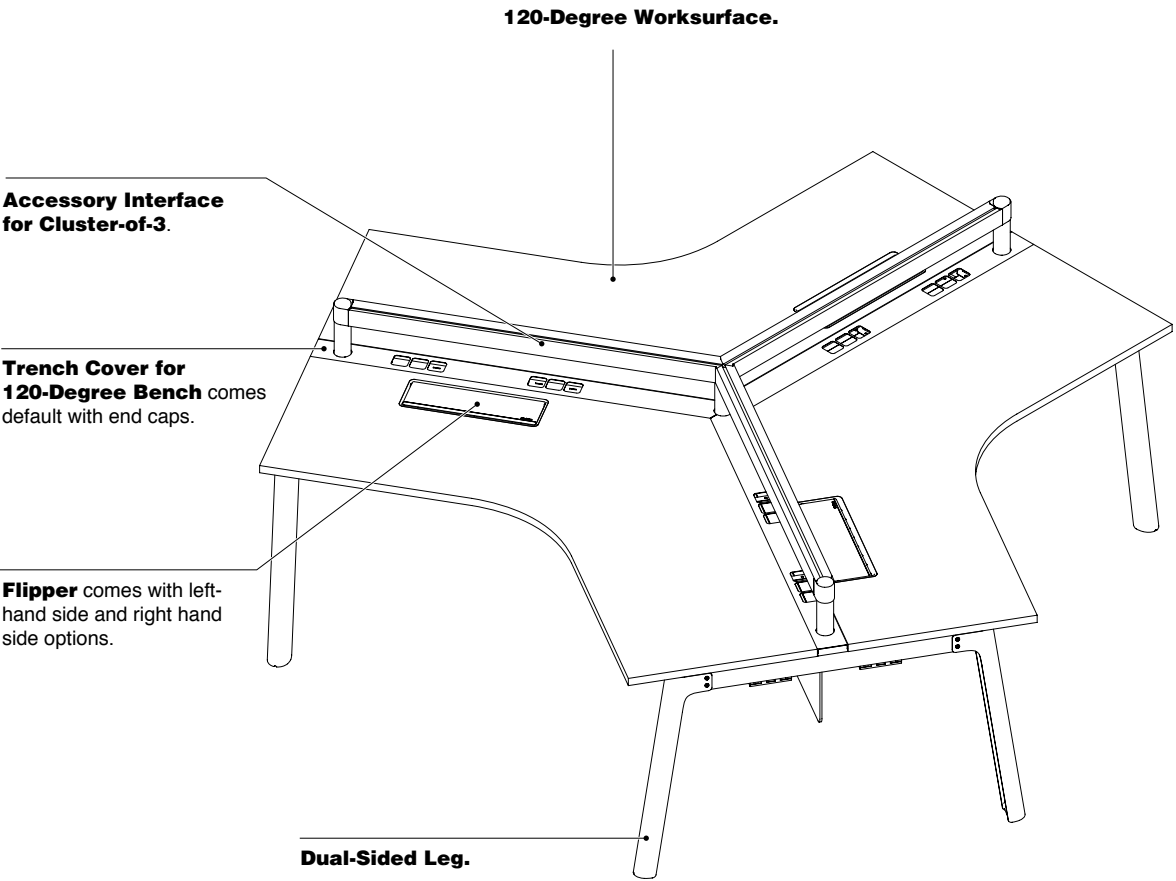

Do not specify Trench Cover in front of Return Desk.

Return Desk should be only applied to linear desk in perpendicular manner.

To understand more about specifying the Return Beam, refer ► *Product Limitations and Guidelines*.

120 Degree Bench is always in Cluster-of-3 and freestanding as a desk cluster by itself.

Actual Dimensions (mm)	
A	600, 700 or 750
B	1200 or 1400
Height	720

Note: Actual worksurface depths depends on whether its a full depth or reduced depth.

Legs

Side Leg is the main component for understructure.
Width of the Side Leg should follow the depth of bench.
Overall depths of the **dual-sided** bench range from 1200D to 1600D.

Stance leg is a 2 tone leg that is available in all configurations of LexCo Desk Height and HighSit versions for dual sided bench. The top horizontal cover and vertical leg can be specified in different surface finishes.

Horizontal cover on Stance Leg can be specified in a contrasting color.

A-leg is a single rectangular leg that is available in all configurations of LexCo Collection Desk Height and HighSit versions for dual sided bench. The leg is a full steel component for both seated height and HighSit benches.

Post leg has a 90degrees angle. It is available in one tone and in all configurations of LexCo Desk Height and HighSit.

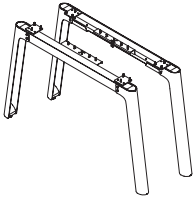

Loop leg is shaped as a rectangular ring. It is available in one tone and in all configurations of LexCo Desk Height and HighSit.

Profile leg is a rectangular leg. It is available in one tone and in all configuration of LexCo Desk Height.

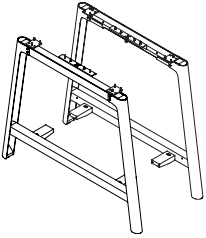

Lexicon Leg is made of aluminum extrusion, and it is available in all configurations of LexCo Desk Height.

Product Details

Stance leg

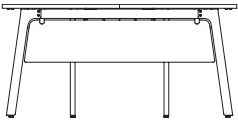

Dual sided, desk height

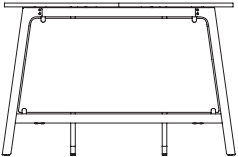

Dual sided, HighSit

For Stance leg, the upper part of the leg cover and lower tube can be specified in any powder coated finish, upcharge may apply.

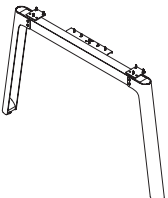

Dual sided, desk height

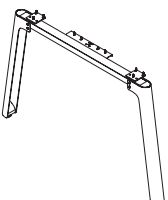

Dual sided, HighSit

Stance leg comes with an option for a **side modesty panel** integrated into the leg. The modesty panel is available in PET and metal.

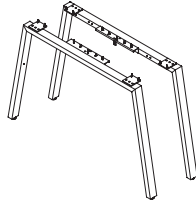

Without EOR option

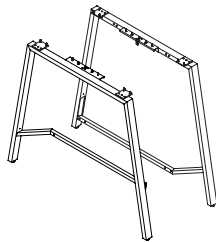

With EOR option

For Stance Leg, if End of Run (EOR) is specified, the leg will be available in one selected finish and horizontal cover will not be offered as default.

A-leg

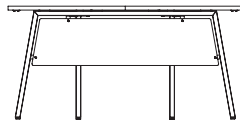

Dual sided, desk height

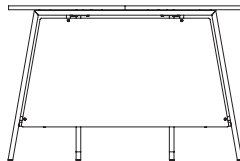

Dual sided, HighSit

The **A-leg** is available in all the powder coated finish offered in LexCo Collection.

Similar to the standard Stance leg, the A-leg comes with an option for a **side modesty panel** integrated into the leg.

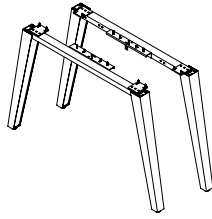

Dual sided, desk height

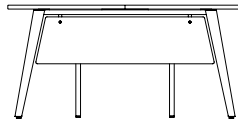

Dual sided, HighSit

Profile leg

Dual-sided, desk height

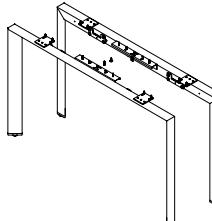

The Profile Leg is available in all the powder coated finish offered in LexCo Collection.

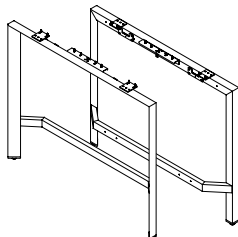

Dual sided, desk height

Profile leg comes with an option for side modesty panel integrated to the leg. The modesty panel is available in PET and metal.

Post leg

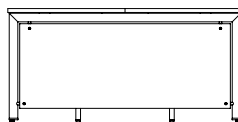

Dual-sided, desk height

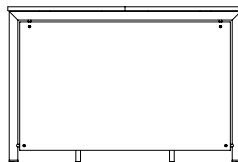

Dual-sided, HighSit

The Post Leg is available in all the powder coated finish offered in LexCo Collection.

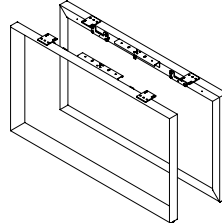

Dual-sided, desk height

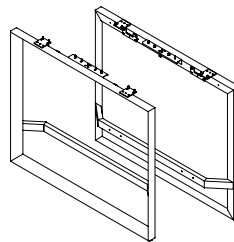

Dual-sided, HighSit

Post leg comes with an option for side modesty panel integrated to the leg. The modesty panel is available in PET and metal.

Loop leg

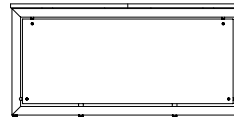

Dual-sided, desk height

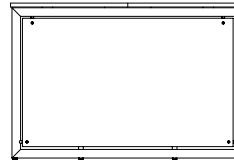

Dual-sided, HighSit

The Loop Leg is available in all the powder coated finish offered in LexCo Collection

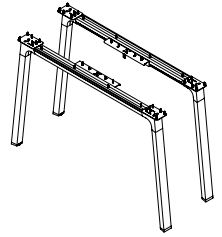

Dual-sided, desk height

Dual-sided, HighSit

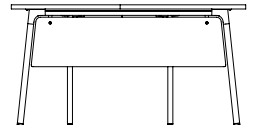

Loop leg comes with an option for side modesty panel integrated to the leg. The modesty panel is available in PET and metal.

Lexicon leg

Dual-sided, desk height

Lexicon Leg is available in all the powder coated finish offered in LexCo Collection.

Dual-sided, desk height

Lexicon leg comes with an option for side modesty panel integrated to the leg. The modesty panel is available in PET and metal.

Surface Materials

- Paint
- All paint finishes.

Legs, continued

Single-sided legs are the main component for understructure of single-sided bench and return desk. Width of the Side Leg should follow the depth of bench.

Single-sided legs range from 500D to 800D, require to choose left hand side or right hand side. 500D only available in A-leg and applicable for return desk configuration only.

For Stance leg, the top horizontal cover and vertical leg can be specified in different surface finishes. Available from 600D to 800D.

A-leg is a full steel component. Available from 500D to 800D.

Profile Leg is available from 600D to 800D.

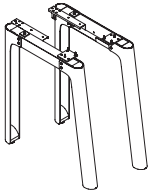

Lexicon Leg is available from 600D to 800D.

Post Leg is available from 600D to 800D.

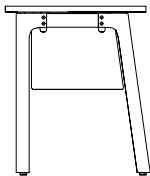

Loop Leg is available from 600D to 800D.

Product Details

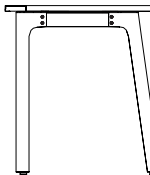

Stance leg

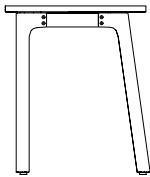

For Stance leg, the upper part of the leg cover and lower tube can be specified in any powder coated finish, upcharge may apply.

Stance leg comes with an option for a **side modesty panel** integrated into the leg. The modesty panel is available in frosted PET and metal.

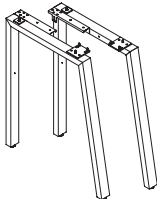

With Trench Cover

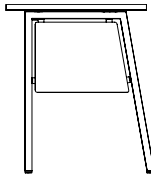

Without Trench Cover

For single-sided leg, there are options for with or without trench cover application.

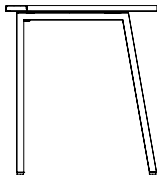

A-leg

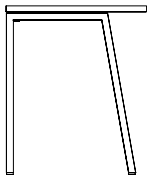

The **A-leg** is available in all the powder coated finish offered in LexCo Collection.

Similar to the standard Stance leg, the A-leg comes with an option for a **side modesty panel** integrated into the leg.

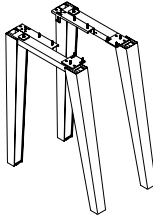

With Trench Cover

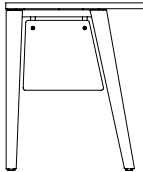

Without Trench Cover

For single-sided leg, there are options for with or without trench cover application.

Profile leg

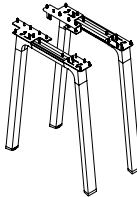

The **Profile Leg** is available in all the powder coated finish offered in LexCo Collection.

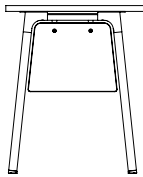

Profile leg comes with an option for side modesty panel integrated into the leg. The modesty panel is available in PET and metal.

Lexicon leg

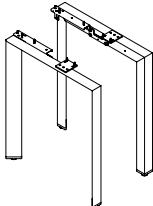

Lexicon Leg is available in all the powder coated finish offered in LexCo Collection.

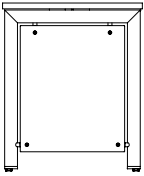

Lexicon leg comes with an option for side modesty panel integrated into the leg. The modesty panel is available in PET and metal.

Post leg

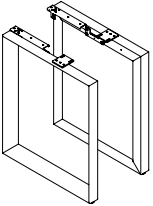

Post Leg is available in all the powder coated finish offered in LexCo Collection.

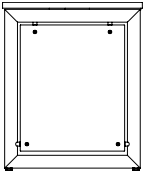

Post leg comes with an option for side modesty panel integrated into the leg. The modesty panel is available in PET and metal.

Loop leg

Loop Leg is available in all the powder coated finish offered in LexCo Collection.

Loop leg comes with an option for side modesty panel integrated into the leg. The modesty panel is available in PET and metal.

Surface Materials

- Paint
- All paint finishes.

Worksurface

Worksurfaces are E0 25mm-thick LPL.

Worksurface with recess for trench will be reduced 45mm.

Scallop edge profile is available in 1mm edge profile.

Power access door allow for easy user access into the cable tray.

Front (user's) edge profile is available in 2mm edge profile.

Soft edge, available as option, reduces unhealthy pressure on forearms, as well as feelings of shoulder and neck fatigue. Edge is soft to the touch and flexes to conform to the arm.

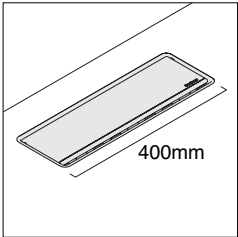

Sarto Screen can be installed to the Worksurface with **Scallop**.

Worksurface with **Sarto Screen cutout**.

Not applicable for the single-sided desk application.

Meeting Table worksurface comes in one piece for a smooth finish without edge band in the middle.

Product Details

Only plastic flipper door is available. No special length of flipper door.

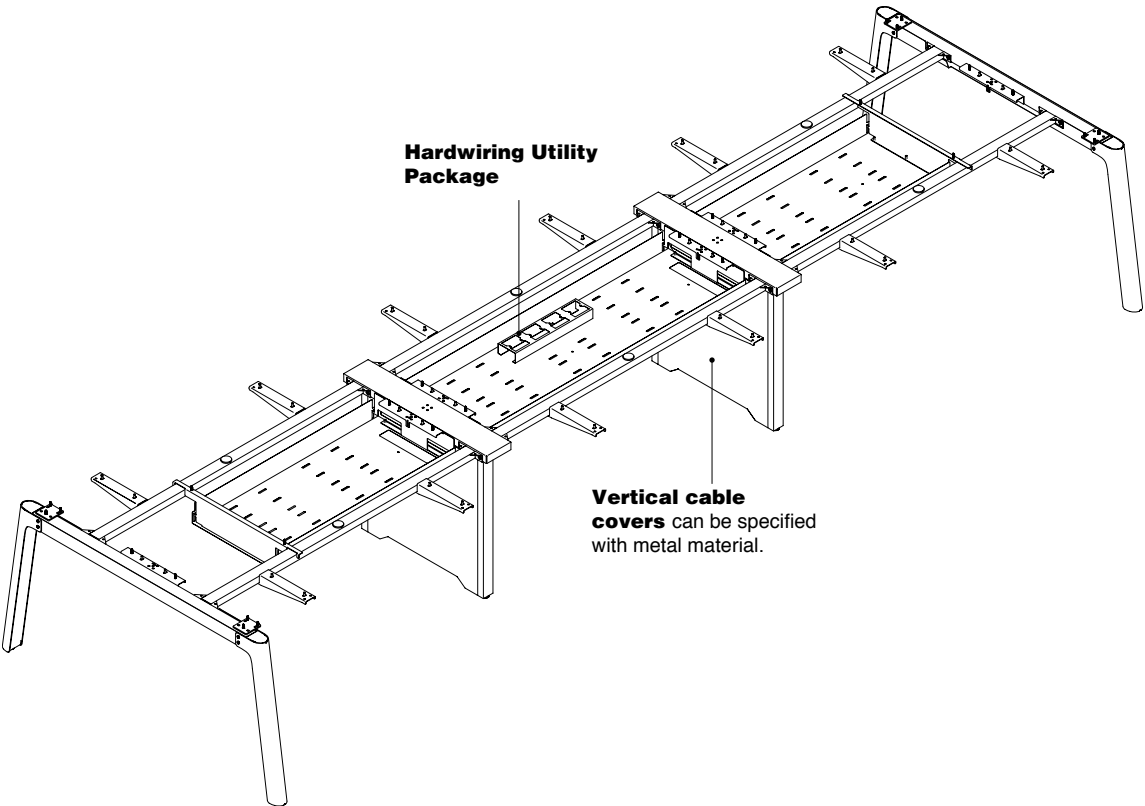

Surface Materials

Worksurface
• LPL

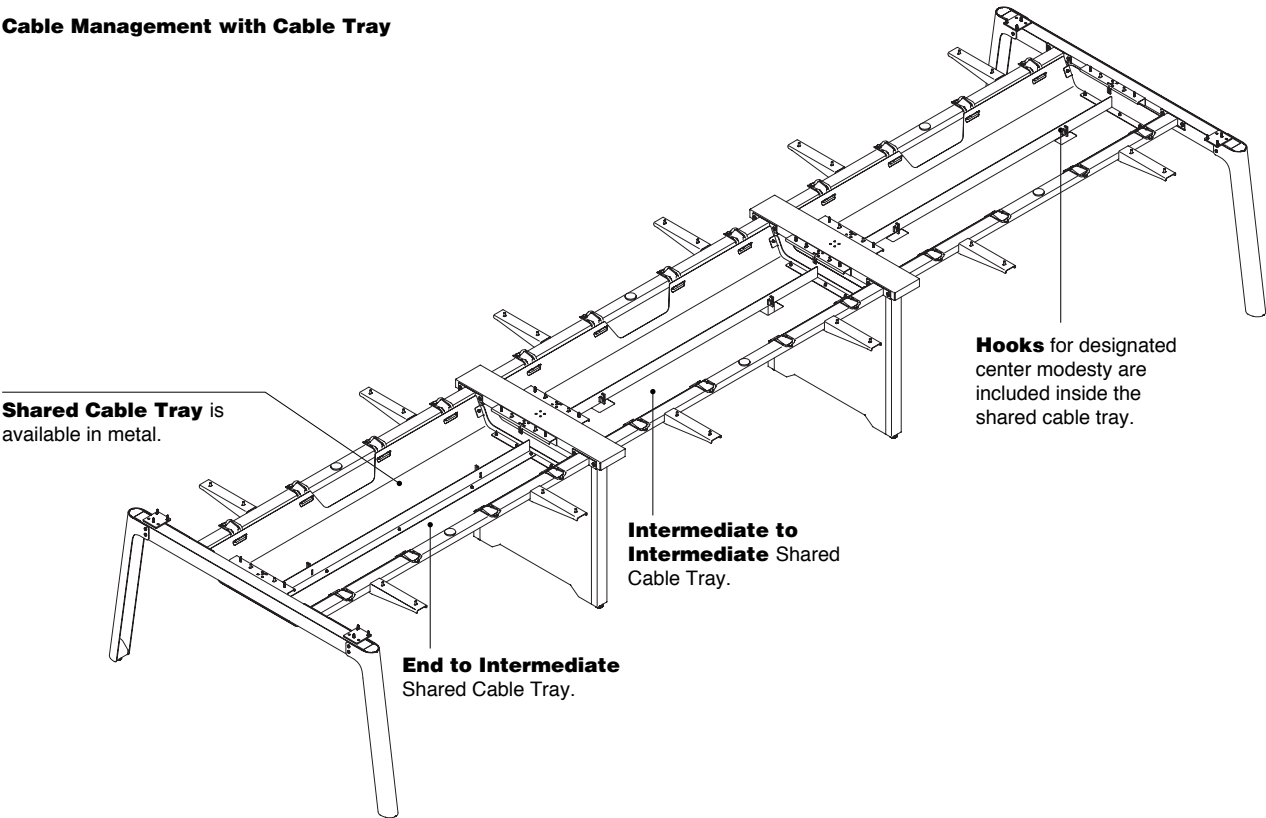

Edgeband
• Plastic

Dual-sided Bench Understructure

Cable Management with New Cable Tray

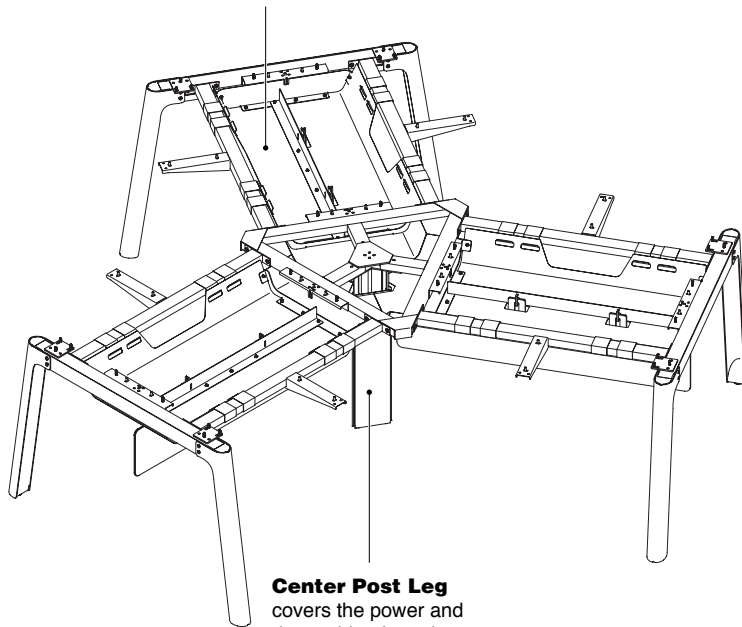

Cable Management with Cable Tray

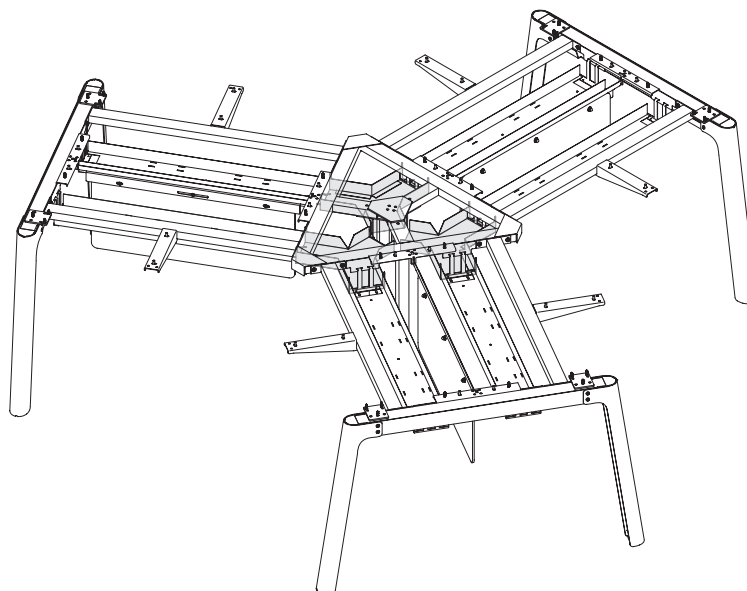

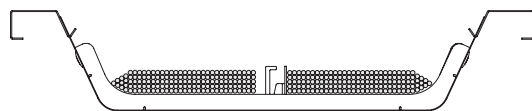

120 Degree Bench Understructure

Shared Cable Tray is available in metal.

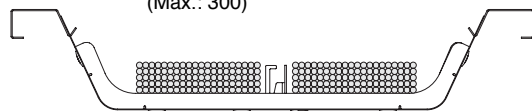

Center Post Leg covers the power and data cables from the ground to the cable tray.

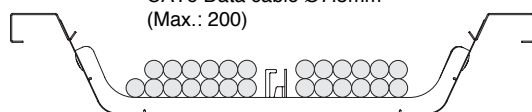

Power/Data Cable and Conduit Limitation**Shared Cable Tray for Dual-Sided/ 120 Degree Bench**

CAT5 Data cable Ø5.5mm
(Max.: 300)

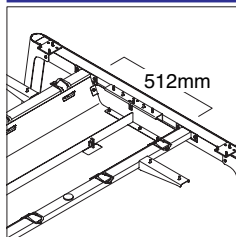

CAT6 Data cable Ø7.5mm
(Max.: 200)

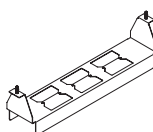

CAT5 Aluminum hose Ø22.5mm
(Max.: 25)

Vertical Cable Cover

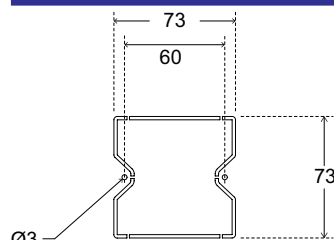

Cable Ø8mm
(Max.: 120)

Product Details

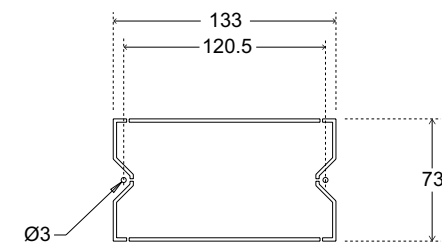

For shared cable tray, the width (512mm) is fixed due to the cable tray was mounted to the horizontal beam.

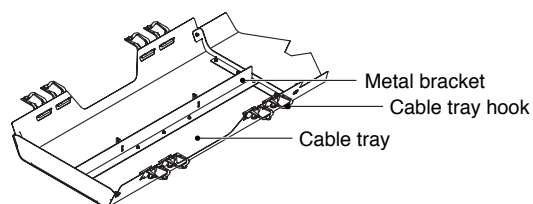

Maximum loading is **30KG** on hardwire utility package.

Cutout on Trench Cover

Type 86 cut out

Double 86 type cut out

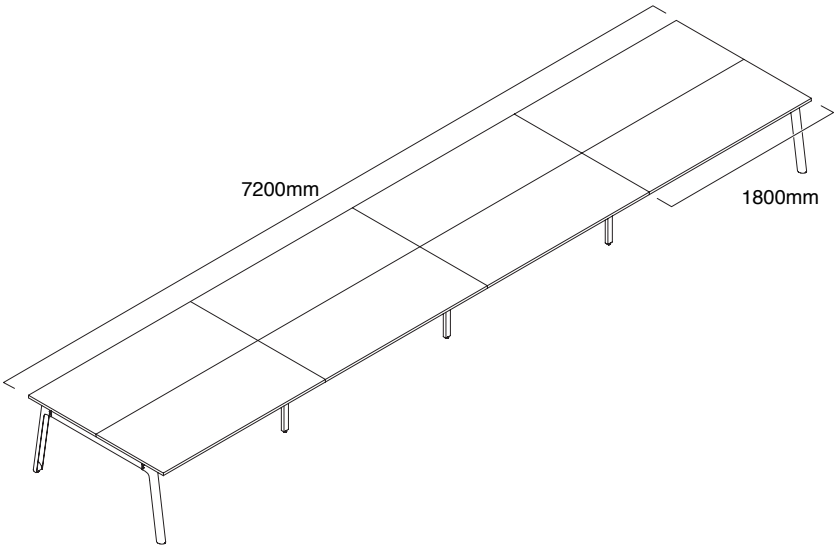

Surface Materials**Shared Cable Tray – 120-Degree**

Cable tray
• Paint

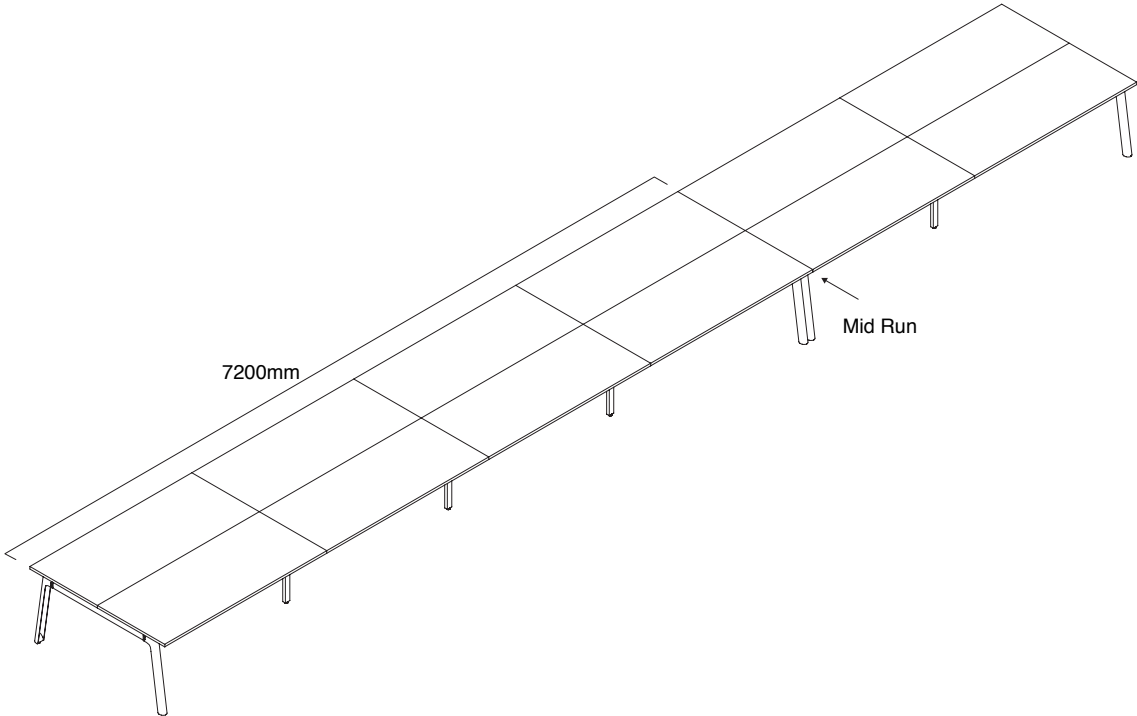

Metal bracket
• Paint

Cable tray hook
• Plastic (Merle)

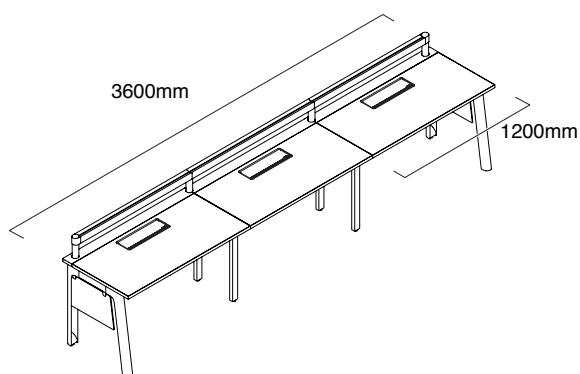

Stability Guidelines

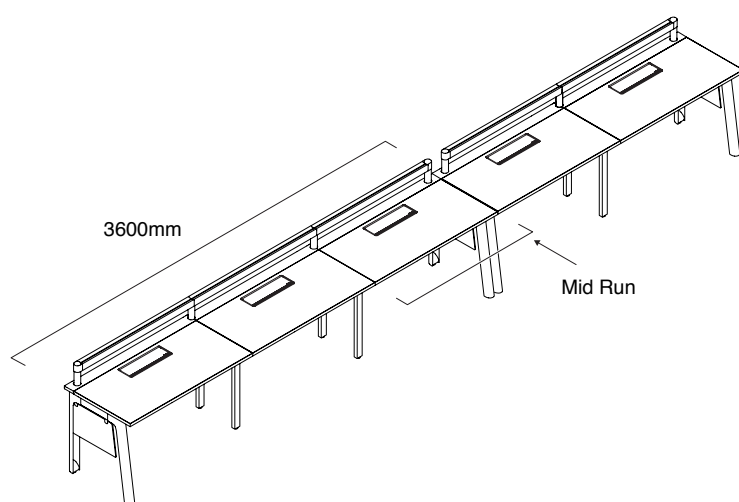

Maximum run of dual-sided bench is 7200mm. Applies to desk height/ HighSit

If dual-sided run is longer than 7200mm, a base is required mid run. Applies to desk height/ HighSit.

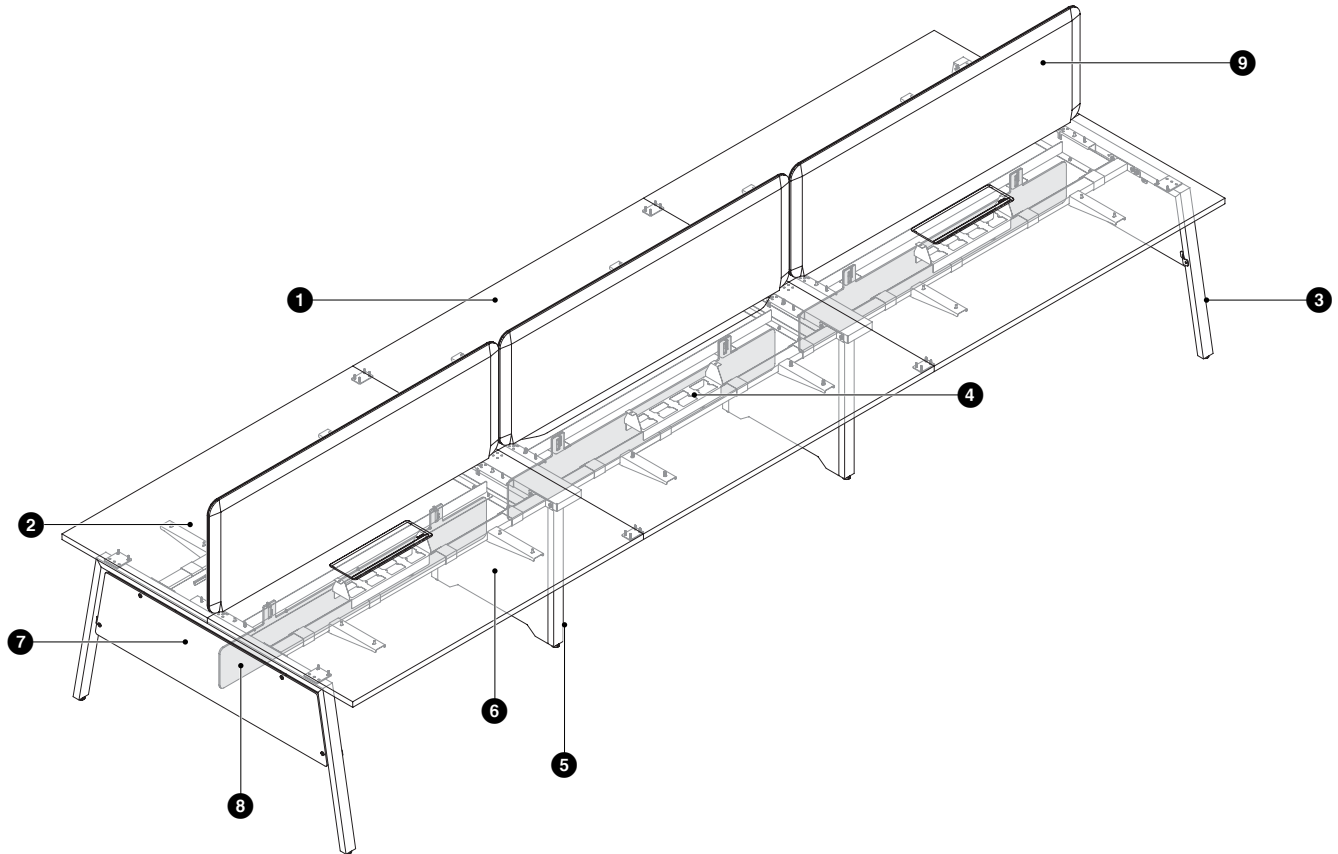

Maximum run of single-sided bench is 3600mm. Applies to desk height.

If single-sided run is longer than 3600mm, a base is required mid run. Applies to desk height.

Product Application Limitations and Guidelines

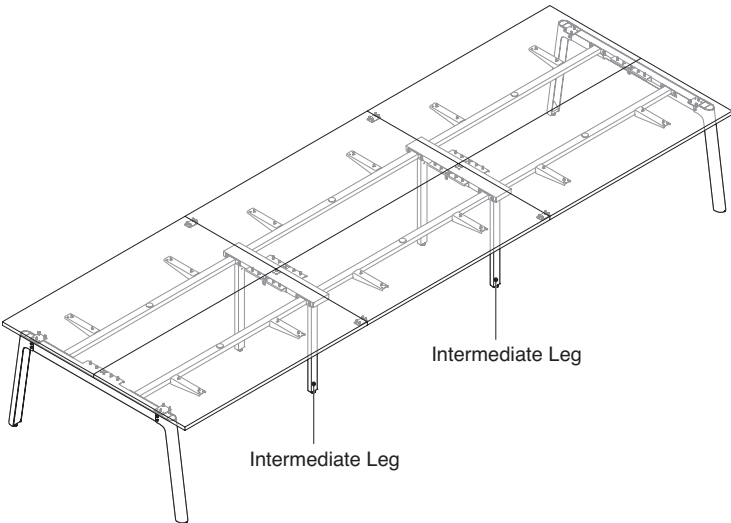

Configuration Limitation

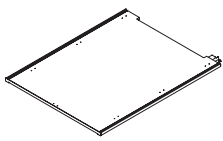

Dual sided bench 2P is not allowed. Minimum configurations is dual sided 4pax, with 2 side legs and 1 middle legs.

Dual sided bench 2P with meeting table is not allowed. Minimum configurations is dual sided 4pax, with 2 side legs and 1 middle legs.

Each additional dual-sided setup require additional middle leg.

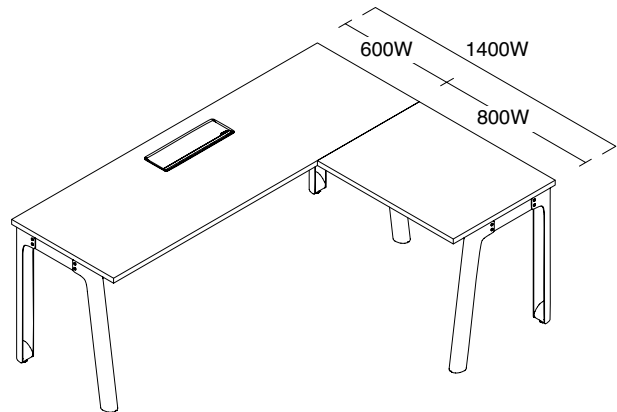

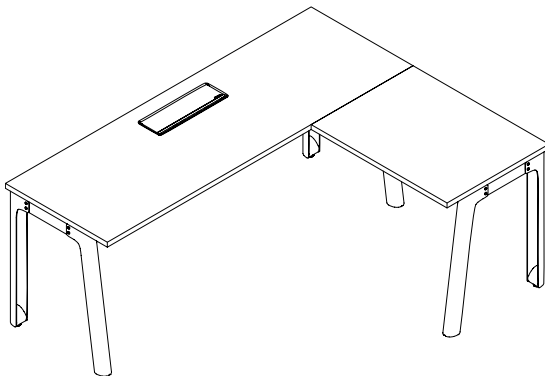

End to Intermediate

Intermediate to Intermediate

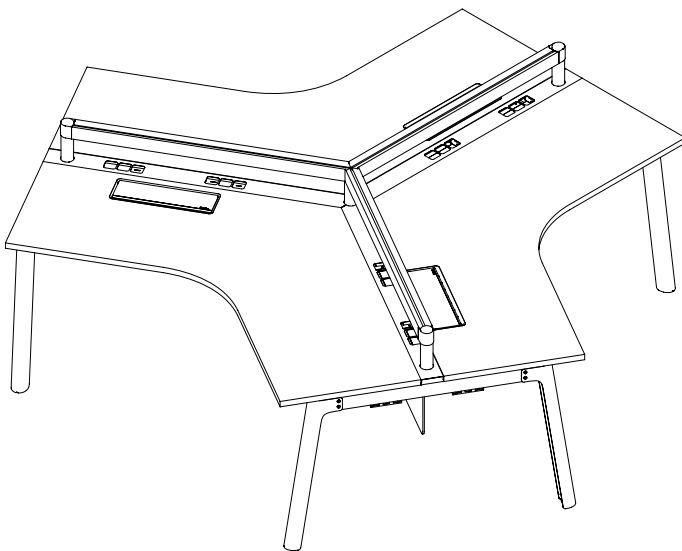

HighSit Footrest Platform is either for End to Intermediate or Intermediate to Intermediate application only.
Both applications **DO NOT** support 2P configuration.

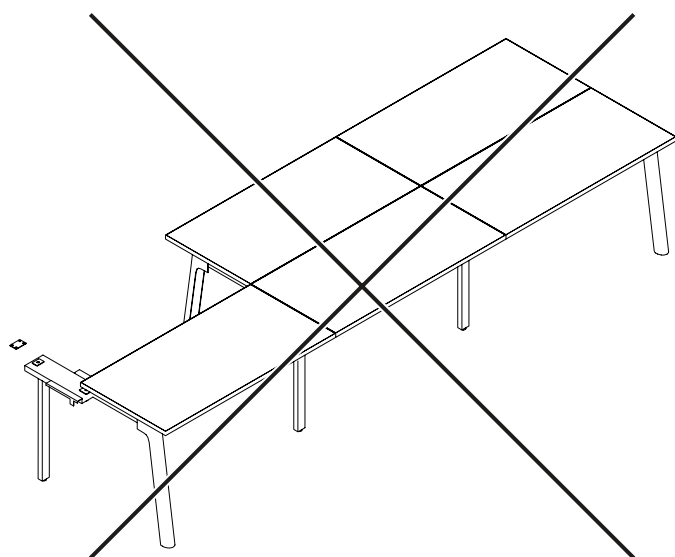

Single-sided bench 1P setting with return desk.

The nominal width of the Return Beam is determined by the aggregated nominal width of the return desk and the nominal depth of the main desk.
For example, if main desk is 600D and return desk is 800W, the return beam width that required to specify is 1400W.

Note: For return desk, the minimum depth of the return is 600D for Stance leg, and 500D for A-leg.
And, the depth of return worksurface shall in correspond to the depth of leg applied.

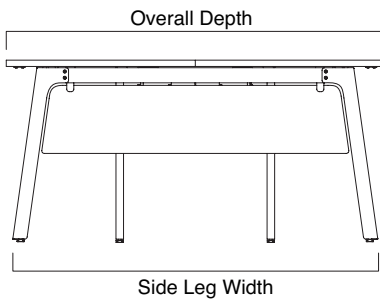

A 120-degree Desk Cluster is always in Cluster-of-3 and freestanding as a desk cluster by itself.

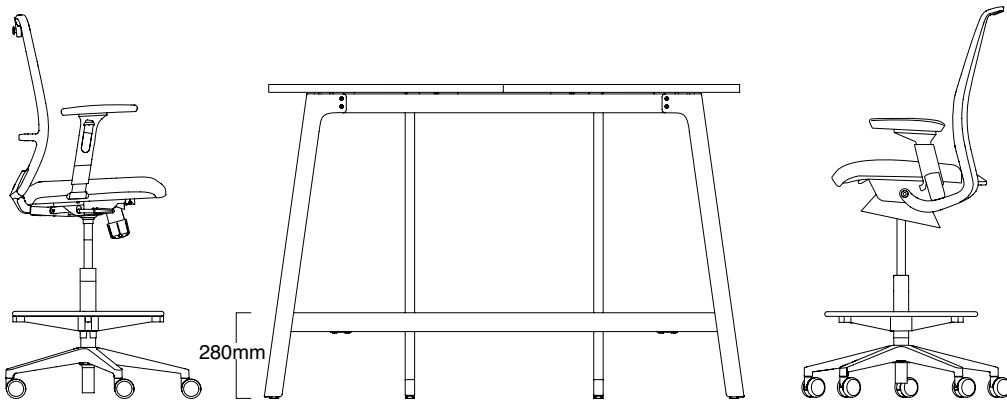

Bench cannot end with egress leg.

Side Leg Limitation (Seated Height and HighSit)

Width of A Leg / Stance Leg should follow depth of dual-sided bench.

HighSit Limitation

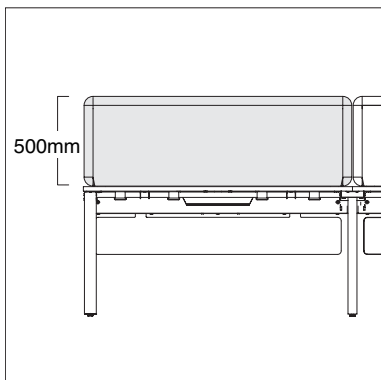

HighSit benches come with carpet. For integrating selected carpet, please specify the option "without carpet". Customer Order Materials (COM) carpet must be installed on-site.

COM carpet must be **5 – 7mm** thick to work with the plastic lip to secure the carpet from wear and tear.

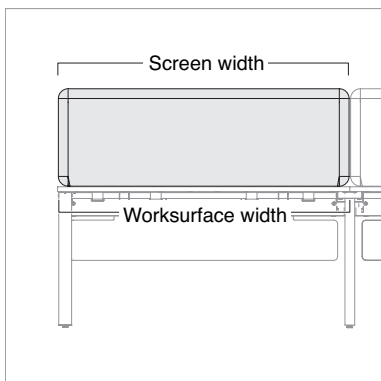

The foot platform rests at 280mm off the floor. Footrings on stool chairs must be adjusted above this height to be able to push chairs completely into the desk. All Steelcase global stools are designed to this criteria.

► **Product Application Limitations and Guidelines, continued on next page**

Sarto Screen Limitation

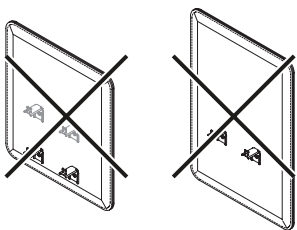

500mm H Sarto screen had passed the **BIFMA test**, if requires screen higher than 500mm, a separated test is needed.

The Sarto screen width follows the worksurface width, i.e select 1600W Sarto screen for 1600W worksurface.

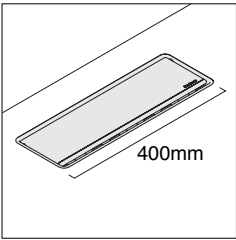

Do NOT use 1500W sarto screen for 1600W worksurface. Because the screen is mounted to the side bracket that connected to the leg.

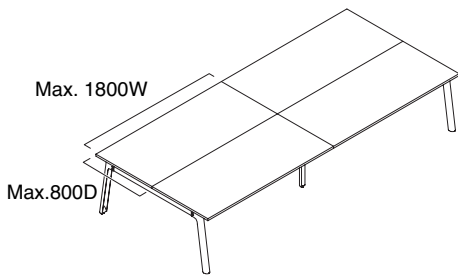

Side hanging screen is **NOT** available for LexCo Collection benches.

► **Product Application Limitations and Guidelines, continued on next page**

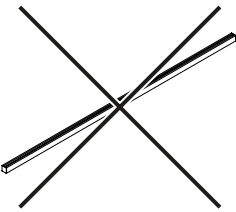

Worksurface Guidelines

Only plastic flipper door is available on LexCo Collection (standard offering) benches. No special length of flipper door.

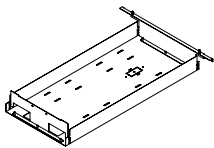

Worksurface is tested up to 1800W x 800D, if requires a larger size, a new test is needed.

SOTO rail is **NOT** applicable for LexCo Collection (standard offering) benches.

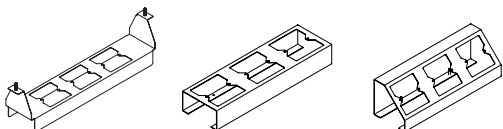

► **Product Application Limitations and Guidelines, continued on next page**

Cable Management Guidelines

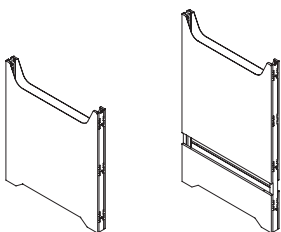

Shared cable tray (new)

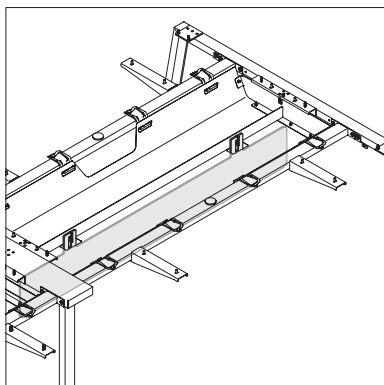

LexCo Collection features shared cable tray.

Hardware utility package can be specified separately for hardwiring installation. All electrical supplies must be purchased and installed separately.

Vertical cable covers can be specified with metal material.

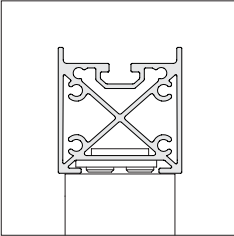

Shared Cable Tray and Center Modesty for Shared

For shared cable tray, only can use center modesty for shared.

► **Product Application Limitations and Guidelines, continued on next page**

Accessory Toolbar Limitation

The Accessory Toolbar offered in LexCo Collection is an elevated accessory interface with single SOTO rail profile inside and this cannot be changed to a double SOTO rail (as in FrameOne).

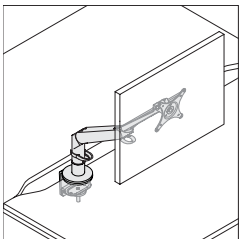

The toolbar is symmetrical and accessories can be hanged/mounted on both sides.

Sarto screens must be mounted on before installing other accessories or worktools in the SOTO rail slot of the Accessory Toolbar.

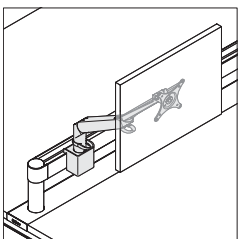

The Toolbar can support maximum 4 Single/2 Double CF Series Evolution monitor arms on one section.

► **Product Application Limitations and Guidelines, continued on next page**

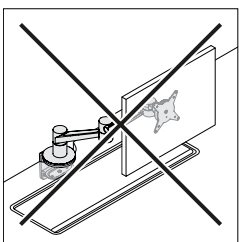

Accessory Application Limitation

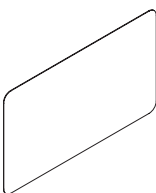

CF Series Evolution monitor arms is recommended and can be mounted on the scallop of LexCo Collection bench with a C-clamp, or

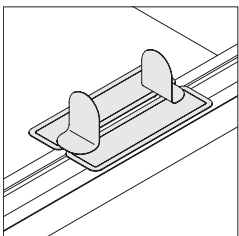

on the Accessory Toolbar with designated bracket.
► Refer Worktools specification guide.

Monitor arms **should not** be mounted in the area directly behind the flipper door.
Monitor arms **cannot be** mounted into the SOTO rail slot of the Accessory Toolbar.

Markerboards should only be written on by dry-erase whiteboard markers.
Do not use water to clean the markerboards. A dry cloth should be used to maintain the markerboards.

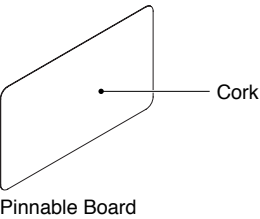

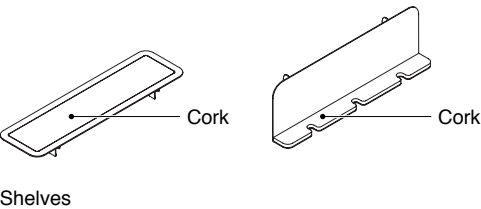

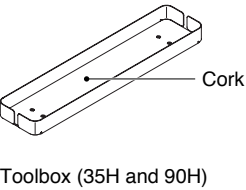

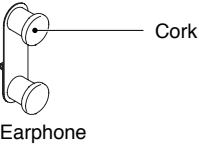

Bookends should be ordered with split shelves.

► **Product Application Limitations and Guidelines, continued on next page**

Accessory Application Limitation

The grain of the cork material would be variable across products as Cork is a natural material, not under manufacturing control. See below items with cork material:

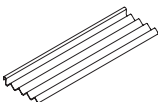

► **Product Application Limitations and Guidelines, continued on next page**

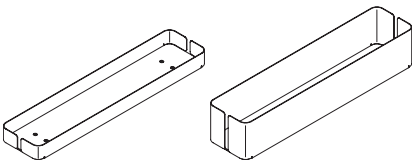

Parts Loading Limitation

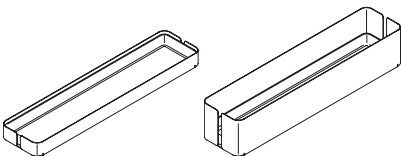

Earphone organizer maximum loading: 1KG

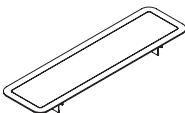

Stationary tray maximum loading : 1 KG

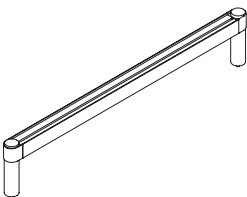

Toolbox maximum loading: 3KG

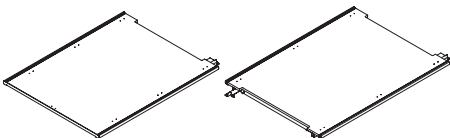

Planter with drip tray maximum loading: 3KG

Split shelves maximum loading: 10KG

1 pax of accessory rail can support 4 monitor arms, 2 on each side.
And maximum loading of monitor arm is 15KG each side.

Footrest Platform maximum loading: 80KG

- 1904 Sea Salt
- 1907 Denim

*PET colors may vary from different batches due to fibre mix and lay up which is an inherent feature of this material.

Thread Color

Define Thread Color

If the user selects different fabrics for SideA/ Side B, Pcon will allow to choose the thread color contrast.

Please choose thread match to Side A / or Side B fabric. Please note that thread match is only possible for 1 side. The other side will be contrast by the set design language for the screen.
