design helen kontouris

La La stool's counteracting conical shapes collide diagonally, creating a fusion of crisp lines with curved forms. Encouraging different views, its sculptural form is charming from every possible angle.

La La stool is lightweight and versatile, allowing it to be moved easily, and can be used as a stool, side table or decorative accessory in residential and commercial environments. Made from virtually indestructible polyethylene, La La's composition enables indoor and outdoor application.

specifications_
