Edvi
Storage

In this new era of work, we do not just need better tools, we need responsive companions that adapt and move with us while keeping our other tools and belongings safely within arms reach.

This is why we created Edvi.

Edvi is personal storage reimagined. Gone are the traditional boxy and bulky aesthetics, typical of the category. In place, a unique almost sci-fi-esque curve wrap shell that creates a striking silhouette. From its castors to its cushion top, Edvi is designed to bring color and performance to any workspace and offer a new coherence element for designers.

Turning Heads

With over 1800 color combinations, Edvi is a character fit for every design story and space. Create unique combinations to add accent in your workspace or harmonize with your existing color scheme.

Design Harmony

Edvi encourages creativity and color harmony. Its unique aesthetics and broad finish range blend harmonically with our benching portfolio.

Match It With A Cushion Top

The curved cushion top magnetically envelops the pedestal with a strong grip to visually enhance Edvi while adding extra seating space.

The cushion top is offered in over 100 different colors in 6 different fabrics creating a variety of customized color combinations.

Seating Companion

We imagine Edvi to be an active companion for you. Move it to the side to invite collaborators for informal discussions at the desk or shift it under the desk while not in use. Edvi supports a weight load up to 300 lbs (136 kg).

Turning Curves

Precision Radius

Edvi features curved corners with a precise radius of 30 mm to accentuate their curvature. This continuous curve is followed through generously on both sides of the storage edges to bring a new softer approach for users. A continuous “shadow line” between the shell on the storage doors lends the wrap a floating and airy aesthetic.

At Steelcase we are constantly tinkering to push how we innovate, design and engineer our products. Edvi is an ode to minimalism, elegantly supported by intricate engineering. To achieve its light, unjointed structure and flowing lines, a single piece of sheet metal sealed with a single weld was used to create the shell. Supported by specially engineered jigs and fixtures, the result is a design that is both delicate and robust.

Soft Closure

Touch. Release. Open.

We tested different thicknesses of steel arriving at a precise 1.5mm for the shell to ensure the closure experience on the Edvi works seamlessly and silently.

Turning Point

A capable work companion supports you through a variety of work postures and is always ready to shift at a moments notice.

Archie Move

People move at work, and so does Edvi. Its mobility is thoughtfully designed with a new castor we call "archie." Inspired by the design of pulleys, the castors have a diameter of 65mm to enhance the movement of Edvi.

The chosen size of the castors and location on the front edges of the pedestal, make them highly accessible to lock them with ease.

Hidden Delight

Complement Edvi with an accessory pen tray to keep stationery, files and other daily items organized and within arms reach.

Turning Times

Comprised of 25% recycled materials by weight and 86% recyclable by weight, with all the steel used being 100% recyclable, Edvi is as much a companion for the earth as it is for you. Carbon footprint is small and its simple disassembly makes it easy to recycle.

Optimized Material Use

Optimizing material usage to reduce waste is a commitment we make in all of our designs. We precision engineered Edvi with exact dimensions and metal thickness to keep its material profile as slim as possible.

Greener Longevity

93% of the Edvi's material weight is metal composition, giving Edvi performance longevity, and minimizing plastic usage.

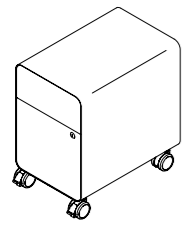

Edvi Personal Storage

Pick your favourite work companion.
